

Analytics Consultant – AI

Overview

- B.Tech/B.E. in Computer Science, Artificial Intelligence, or related field/candidates from other specialisations with relevant experience.
- Minimum 60% aggregate marks (or equivalent) across academics; any backlogs, if applicable, must be cleared within the prescribed course duration.
- 2+ years of hands-on experience in AI, Agentic AI, Machine Learning/AI Engineering
- 📍 Edapally, Kochi

About TurnB

TurnB is a leading provider of business analytics, consulting, and AI solutions, helping businesses unlock actionable insights and drive data-led transformation. We combine cutting edge technology with strategic expertise to deliver business impact solutions for our clients. With deep experience in AI-driven data analytics and advanced business intelligence, we help organizations solve complex business challenges and accelerate growth. As a Great Place to Work® (GPTW) Certified organization, we are committed to fostering a culture of innovation, collaboration, and continuous learning for our people.

About the role

We are seeking a talented and experienced Analytics Consultant – AI to join our growing team and play a pivotal role in the development and deployment of innovative AI solutions. The candidate should have hands-on expertise in building, deploying, and maintaining enterprise grade AI and Agentic AI applications/ AI Engineering.

Being a key contributor to our AI transformation, you will collaborate closely with AI Architects, Data Scientists, and delivery teams to bring cutting-edge AI concepts to life. The role requires strong analytical capabilities, a solution-oriented mindset, and the ability to independently contribute to client engagements while collaborating effectively within a team. A curiosity driven mindset, strong problem-solving skills, and effective communication are key for success in this role.

Job Responsibilities

- Design, develop, and implement machine learning models and AI algorithms, from initial prototyping to production deployment, and provide technical support and troubleshooting for deployed AI systems.
- Optimize AI models for performance, scalability, and efficiency, and monitor their effectiveness in production environments.

- Partner closely with project managers, senior consultants, and customers, collaborating effectively with cross-functional teams, including product managers, data scientists, and software engineers, to understand requirements and deliver impactful AI solutions.
- Work with large and complex datasets, performing data cleaning, feature engineering, and data pipeline development to prepare data for AI model training.
- Stay updated with the latest advancements in AI/ML research and technologies, evaluating their potential application to business challenges.
- Act as a subject matter expert for the team in designing and recommending appropriate analytical approaches and methodology in addressing key data/business issues.
- Integrate AI models and solutions into existing enterprise systems and applications, ensuring seamless functionality and performance.

Technical Skills

Strong understanding of:

- Machine learning algorithms, deep learning concepts, and statistical modelling, along with data manipulation and analysis using libraries such as Pandas and NumPy.
- Version control using Git and collaborative development workflows, along with MLOps practices, model deployment, monitoring, and CI/CD for AI/ML applications.
- REST API development and integration using FastAPI, Flask, or similar Python frameworks.
- Prompt engineering and LLM-based application development.
- Containerisation using Docker.
- Strong programming skills in Python (or similar languages), with extensive experience in AI/ML frameworks such as TensorFlow, PyTorch, and scikit-learn.

Hands-on experience with Azure AI services such as:

- Azure ML
- Azure AI Foundry
- Microsoft Fabric
- Azure Open AI
- Azure AI Search

Familiarity with cloud platforms (AWS, Azure, GCP) and their AI/ML services is highly valued. Exposure to Microsoft Power Platform (Copilot Studio, Power Automate) is an advantage.
